

SurePulse

Pulser Tester

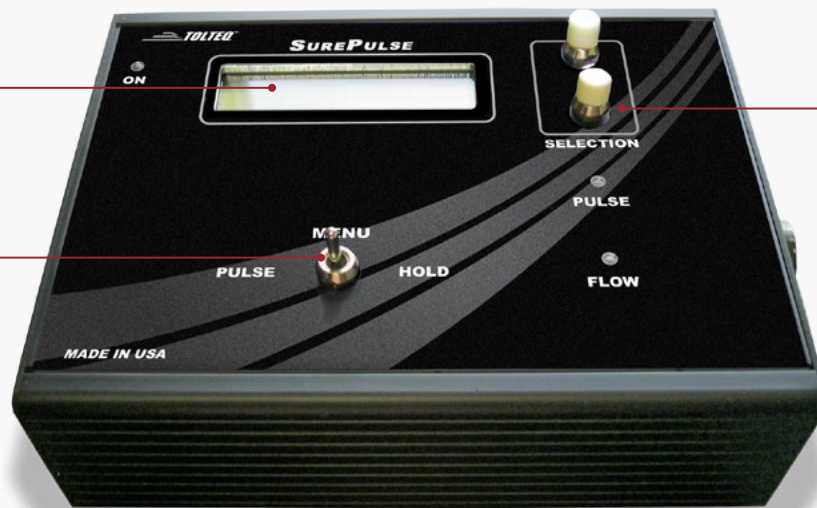

Because Testing a Pulser Shouldn't be Complicated

The SurePulse pulser tester is a one-box solution that will dramatically streamline your workflow and reduce user-error by allowing you to activate your pulse function, test pulser flow, and display current draw—all without the need for complicated connections and cumbersome MWD tools.

Displays pulse width and current draw

Select pulse active or pulse hold

Select your pulse width

Features

- Connect directly to a pulser with the supplied cable
- Powered with AC/DC universal power supply (110/230V A/C)
- Includes an easy-to-read LCD display with a simple menu interface
- Activate a pulse signal with selectable predefined pulse widths
- Can be set for indefinite hold, causing a constant pulse signal
- Doubles as a Tool Tracker™ cable for downloading environmental and tool data*
- Monitor pulse and flow states with dedicated LEDs
- Compact extruded aluminum enclosure (4.74"L x 6.3"W x 2.03"H)

*Requires Tool Tracker software
